STRATEGIC TECHNOLOGY PARTNERS

Wanstor: The IT partner of choice for schools, colleges and universities

Wanstor will help your school, college or university improve IT and technology performance by removing cost, complexity and barriers to change.

We have an open, pragmatic approach to IT, working with IT departments - not around them. Many educational establishments find themselves lured by seemingly cut-price offers on technology and IT support, often unaware that these supposed 'deals' represent a distortion of the real price to be paid in failing to implement IT support models correctly aligned with operational requirements.

To successfully address IT, technology, student attraction and retention challenges that educational establishments face, a set of diverse skills, systems and processes (often expensive to establish internally) are fundamental. These usually require a trusted IT service and solution provider to meet support, service and product fulfilment needs.

Headquartered in central London, Wanstor prides itself on delivering highly available and highly secure IT services and solutions to schools, colleges and universities for over 15 years.

The IT services and solutions which we provide to schools, colleges and universities, help them to deliver a better student experience and make administrative tasks more effective and efficient in their delivery.

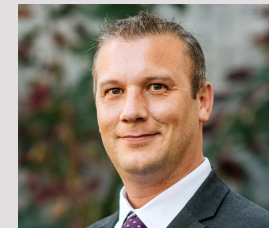

We look forward to working with you.
