Top reasons to invest in all flash storage systems

Wanstor and Fujitsu work together to deliver flash storage solutions for restaurant and hospitality businesses. Based on our extensive IT experience and expertise we believe restaurant and hospitality businesses should seriously consider Fujitsu's ETERNUS AF storage range to help them accelerate, modernise and transform their data centres in a flash new world. At Wanstor we believe the main reasons why restaurant and hospitality businesses should invest in Fujitsu ETERNUS AF storage are:

Leading Performance Architecture

ETERNUS AF takes top positions in official SPC benchmarks and in specific customer evaluations vs the competition.

Advantages for your business:

- Increase application performance by factors of 5
- Benefit from 8 times more transactions
- Drive system utilisation up to 90%

Reduced Operating Costs

ETERNUS AF offers higher performance, and needs less space, power and cooling resources compared to traditional data storage solutions.

Advantages for your business:

- Reduce power and cooling consumption by up to 85%
- Save space thanks to 10 times higher density
- Reduce maintenance costs by up to 80%

100% Interoperability with Hybrid Systems

ETERNUS AF all-flash storage is fully compatible with other storage systems.

Advantages for your business:

- Easy and gradual migration from hybrid storage to all-flash
- Data can be mirrored and replicated between hybrid and all-flash
- Seamless administration experience that increases productivity
- Maximum system interoperability – less training required

Simple and Affordable Business Continuity

Flexible data mirroring and data replication functions. ETERNUS Storage Cluster supports simple and transparent failovers to avoid downtime.

Advantages for your business:

- ETERNUS Storage Cluster delivers maximum business continuity
- Simple data replication and effective failover between hybrid systems
- Unmatched flexibility for disaster recovery between remote and central locations

Flexible Data Reduction Technology

ETERNUS AF provides advanced inline data reduction technologies in combination with flexible configuration options.

Advantages for your business:

- Increase effective capacity of flash by an average factor of 5
- Benefit from a choice of compression and/or deduplication at app level
- Set data reduction options to optimize capacity, or keep them off for high-performance SLAs

Automated Management of SLA's

System performance can be allocated to application data by defining the priority or the response time, the rest is done automatically.

Advantages for your business:

- Storage performance is allocated by business priorities and by service levels, not by random events
- Tuning storage for data services with diverse I/O profiles is easier
- Manage more data with the same number of resources

Some of our restaurant and hospitality customers include:

wagamama

the
restaurant
group plc

Jamie's
